## Application

The JOVENTA SPRING RETURN electric damper-actuator series has been specially developed for the motorized operation of safety air dampers, (anti-icing) in air conditioning systems, smoke evacuation dampers and sealing dampers.
When the control signal is applied, the actuator drives the damper to the operational position, while evenly tensioning the integrated spring. After a power failure the stored energy in the spring immediately brings the damper to the safety position.
Manual operation is automatically cancelled when the actuator is in electrical operation.
The compact design and universal adapter fitted with limitation of rotation angle make this actuator highly versatile.

## Features

- ON/OFF and Floating control signal
- Up to 5 actuators in parallel operation possible
- Electrical connection with halegen-free cable
- Simple direct mounting with universal adapter on $\varnothing 12 \mathrm{~mm}$ to 19 mm shaft or $10-12-14 \mathrm{~mm}$ square shaft.
An optional M9220-600 Jackshaft Coupler Kit is available for 19 to 27 mm round shafts, or 16,18 , and 19 mm square shafts
- 80 mm min shaft length
- Tandem Operation possible
- Limitation of rotation angle
- Manual positioning with crank handle
- 2 auxiliary switches, 1 adjustable (See back page for settings)
- Automatic shut-off at end position (overload switch)
- Energy saving at end positions
- Actuators available with 1 m halogen-free cable
- Devices meet CE requirements

DBF1.20 Series ON/OFF and Floating Spring Return Actuators

Technical Specifications

| Actuator | DBF1.20(S) |
| :---: | :---: |
| Torque | 20 Nm |
| Damper area* | 4.0 m ${ }^{2}$ |
| Running time Motor | 150 s |
| Running time Spring return | 20 s |
| Supply Voltage | AC/DC 24 V |
| Frequency | $50-60 \mathrm{~Hz}$ |
| Power Consumption |  |

## Wiring Diagrams

## Auxiliary Switches (S)

## Limitation of rotation angle

 value determined in Step 2.
For a rotation range of $65^{\circ}$, mount one stroke limiting stops in the minimum stroke position.

The 10S and 20S models include two integral auxiliary switches with a switch adjuster accessible on either face of the actuator.
The nominal factory setting for auxiliary switch S1 is $11^{\circ}$ closing, and the nominal factory setting for auxiliary switch S 2 is $81^{\circ}$ opening.
The switch point of auxiliary switch S1 is fixed.
The switch point of auxiliary switch S 2 is independently and continuously adjustable from $25^{\circ}$ to $95^{\circ}$.
The switching position can be manually changed to any required position by turning the ratchet.

## Ordering Codes
