SECURITYFIRE

## Application

The JOVENTA SECURITY FIRE electric, spring return damperactuator series has been specially developed for the motorized operation of safety dampers e.g. fire and smoke protection dampers. When the control signal is applied the actuator drives the damper to the operational position, while evenly tensioning the integrated spring. After a power failure the stored energy in the spring immediately brings the damper to the safety position. Manual operation is automatically cancelled when the actuator is in electrical operation.

## Key features

- 2-point control
- 2 auxiliary switches

See back page for settings

- 10/11/12/14 mm steel adapter for square shaft
- Plug in terminal block connection
- Direct connection of ST1.72N or ST1.90N temperature sensor to monitor shaft internal temp. Switch point of temperature sensor ca. $72^{\circ} \mathrm{C}$ or ca. $90^{\circ} \mathrm{C}$
- Actuator temperature sensor to monitor ambient temperature, switch point of temperature sensor ca. $72^{\circ} \mathrm{C}$
- Low noise level
- Manual operation with crank handle
- Energy saving at end positions
- Actuators available with 1 m halogen-free cable
- Customized versions available
- Devices meet CE requirements
